*EGG PRODUCTION*

## Technical Description

- Filtration: 300-mesh precision filters at the front end effectively remove particulate impurities.
- Medication: Imported medication devices provide precise dosing, no electricity required.
- Pressure Regulation: Adjustable nipples cater to different ages, with manual/automatic flushing options.
- Drinking Nipples: 360° pecking and top-down water flow ensure water availability.
- Drinking Pipe: Square design prevents algae growth and features stretchable connectors for stress reduction.
- End Components: Transparent display tubes and centralized drainage pipes for easy water level observation and line flushing.

## Technical Parameters

	Layer	Pullet	20cm side impact water flow	20cm top impact water flow
Red Nipple	8-10 units/birds	8-12 units/birds	20ml/min	40ml/min
Yellow Nipple	8-10 units/birds	8-12 units/birds	30ml/min	60ml/min
